(54) Title: **ARCHITECTURE AND METHOD FOR THE CENTRALISED CONTROL OF REMOTE PERIPHERAL ELECTRONIC DEVICES**

(57) Abstract: Architecture and method for the centralised control of events occurring in correspondence with remote peripheral electronic devices (11a, 11b, ... 11n), in particular wireless devices, provided with radio units (15, 17) which are periodically turned on and turned off in order to limit electric power consumption to a minimum, said architecture and said method allowing for the synchronised bi-directional transmission of information between said peripheral devices (11a, 11b, ... 11n) and a central device (111).
